Clean & Safe™ Guarantee

As a supplier of protective products, contributing to the safety of consumers and workers is of utmost importance to RONCO. For that reason, we have adopted the principles of the Clean & Safe™ Guarantee. From the storage of the raw material to the delivery of the product to your warehouse, RONCO is committed to maintaining the integrity and hygiene of each

of the products we offer. This Guarantee ensures that products remain sanitary throughout the manufacturing process, including the:

- Quality and storage of raw material;
- Handling and transformation at the manufacturing facility; and
- Verification and control of finished product quality

Raw Material

Close attention is paid to the consistent quality and storage of the raw material used in the manufacturing process. This stage is the first step in ensuring consistency in the quality of the finished product.

Quality Control

Product quality is verified at several stages before being released for delivery to the customers. Random quality control is done online during production. A pre-shipment inspection then occurs. Upon receiving the items, an additional test is conducted by internal quality control on product samples in order to ensure that they meet standards and specifications.

Manufacturing Facility

This step of the Clean & Safe™ system focuses on the:

- Safety of employees;
- Hygiene of workers, particularly of those individuals in direct contact with the product;
- Cleanliness of the packaging materials; and
- Storage of the finished goods until shipment

The Guarantee's Benefits for You

With this Guarantee in place, you can be confident that you will receive products that:

- Are hygienic, reduce the risk of contamination;
- Offer consistent product quality; and
- Meet and exceed industry standards.

Quality at RONCO

Providing consistent quality products: our priority

RONCO is a customer-focused company committed to providing consistent quality products and services to respond to industry's safety product requirements.

We are dedicated to the support and realization of our quality policies, objectives and systems. In order to achieve our goals, employee training is an important part of our corporate culture.

Quality Control

As a part of our efforts to ensure that we only deliver consistent quality products, all of our products undergo strict quality inspections, to ensure that they comply with our specifications.

- During the manufacturing process, on-line inspections are performed.
- Before products are shipped, RONCO representatives conduct a quality inspection of random samples, to ensure that products meet specifications.
- As the products are being loaded, we check to ensure that the packaging is in good condition.
- Upon arrival of the goods at our main RONCO warehouse in Canada, a further quality inspection is performed.
- For shipments made directly to our customers, our quality department coordinates (in consultation with the customer) a quality inspection by our representatives across Canada.

HACCP

In response to increased consumer demands for food safety, Canada's governments — both federal and some provincial — have developed food safety programs incorporating internationally recognized HACCP — Hazard Analysis Critical Control Points — principles to reduce the risk of cross-contamination. RONCO features a full line of disposable and reusable gloves, as well as protective gear, many offered in a variety of colours, to assist you in achieving HACCP compliance.

CFIA

We recognize that many of our customers in the food processing industry require "Letters of Non-Objection" from the CFIA (Canadian Food Inspection Agency). We have successfully obtained these letters for products that are used in the food processing and service industries.

ISO

RONCO is ISO 9001:2008 certified as well as ISO 13485:2003 certified for our medical device products. As such, our entire company is committed to providing products and services that consistently satisfy and exceed the requirements and expectations of our customers.

- We have established and will continually improve the effectiveness of our quality management system, embracing the values of our business and customers.
- We strive to work with suppliers who are also ISO 9001:2008 certified.

ISO 22000

The Ultimate Standard in Food Safety

RONCO is ISO 22000 certified as a measure of excellence. This certification is your guarantee that RONCO products are manufactured and controlled according to international food standards.

For more information on how RONCO's ISO 22000 certification can help you reduce your risks of food contamination, contact RONCO now.

RONCO is the first North American Manufacturer of Gloves and Plastic products to be ISO 22000 certified.

About RONCO

Past, Present and Future

Founded in 1996, RONCO Protective Products is a world class manufacturer of safety products for head, hand, and body protection. Since its inception, RONCO has strived to meet and exceed customers' needs through commitment to manufacturing consistent quality products and providing the best service industry wide.

Our Vision

To become a leader in the supply of safety (PPE) products.

Our Mission

To provide our customers with consistent quality products to enhance user safety, confidence and productivity at competitive prices.

Operations

RONCO's head office is in Concord (north of Toronto), Ontario, Canada and its operations encompass Canada and the Far East. Sales offices all across Canada complement RONCO's presence in the Canadian market. High tech and state of the art manufacturing facilities in China and Malaysia, allow RONCO to manufacture top quality products while remaining extremely competitive. An on-site team of dedicated quality assurance inspectors and market researchers ensure that RONCO's corporate values are being enforced for human resources standards, manufacturing and quality processes.

RONCO takes pride in the quality of the people involved at all levels of its operations and ensures that its employees are satisfied with their work and have the tools they need to achieve their tasks effectively time after time. By creating more value in the workplace, RONCO is able to create more value in the marketplace.

Your satisfaction drives our ambition

Bump Caps, Traffic Vests

Disposable Gloves

RONCO features a wide range of disposable gloves; in Nitech®, synthetic material, vinyl, latex, nitrile and polyethylene.

Most of these are available as both lightly powdered and powder free gloves, with sizes ranging from X-Small to XX-Large.

RONCO provides options in disposable gloves that cater to a variety of applications across a wide range of industries including food processing, food service, beauty, industrial, light chemical and medical among others.

Quality Control

At RONCO, we believe in strict quality checks at various stages, including during production, packaging and upon arrival. We check the gloves for various properties including the following:

PROPERTIES	DESCRIPTION
Length	
Thickness	Fingertip Palm Cuff
Physical properties	Tensile strength, before and after aging Elongation, before and after aging Maximum powder level
Major visual defects	Holes in the fingers Holes between fingers Uneven colour Coagulum > 5 mm Weakness between fingers Foreign particles/dirt/stains (Non-removable) Mixed size Excess powder No bead or not completed bead
Minor visual defects	Removable dirt Slight colour variation Small stains Coagulum < 5mm Uncharacteristic odour Blister bead
Pinholes	

RONCO's AQL (Accepted Quality Level) meets or exceeds the international standards.

AQL:

Pinholes	1.5
Major defects	2.5
Minor defects	4.0

Colour Coding System

RONCO uses an innovative size selection color coding system on the entire range of disposable glove dispensers to facilitate easy identification of the correct glove size. Each dispenser is color coded on both ends as well as on the top panel making it easier to identify the right glove size.

Small / Petit

Medium / Moyen

Large / Grand

X-Large / T grand

XX-Large / TT grand

HACCP Compliance

RONCO offers a wide range of gloves in a variety of colors to assist in HACCP (Hazard Analysis and Critical Control Points) compliance. The different colours help you reduce the risk of cross-contamination at your workplace.

Certifications

For all the products used in food service and food production industry, RONCO has obtained certification from CFIA (Canadian Food Inspection Agency), that make them suitable for use in food establishments.

RONCO also has obtained medical devices licenses for its range of examination gloves.

As an industry leader, RONCO innovates again by introducing the most advanced material technology in the market. Fabricated from special materials, this glove offers flexibility, touch sensitivity and elasticity while maintaining the durability and resistance to some chemicals.

FEATURES

Industrial Gloves

Unsupported Gloves

Unsupported gloves are manufactured by dipping a ceramic mould directly into Natural Rubber Latex and/or Poly Vinyl Chloride (PVC), and/or Nitrile solution and other polymers. The type of polymer used and the thickness determines the level of resistance the glove have to chemicals, abrasions, cuts, and others.

UNSUPPORTED FLOCKLINED

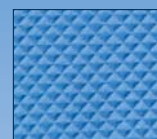

The inside of a flock-lined glove is sprayed or dipped with cotton before drying. This type of glove provides added comfort and also absorbs excess sweat from hands.

UNSUPPORTED UNLINED

An unlined glove is subjected to a process called chlorination, which makes donning the glove easier without putting any powder inside.

Types of Grip

DIAMOND EMBOSSED

DIAMOND RECESSED / FISH SCALE

Glove Materials - Unsupported Gloves

NITRILE

- Provides good cut, snag, puncture, and abrasion resistance. Also provides good resistance to bases, oils, solvents, esters, grease and animal fat.
- Comes in both unlined as well as flocklined

LATEX

- Provides a relatively high level of flexibility and is very elastic. Some people exhibit an allergic reaction to the proteins found in natural rubber, latex gloves are not recommended for them.
- Comes in both unlined as well as flocklined

NEOPRENE

- Provides resistance to oils, alcohols, acids, inks and ketones and leads to less hand fatigue.

EN388 - MECHANICAL RATING OVERVIEW

The purpose of a mechanical rating is to inform a worker of the levels of physical protection that they can expect to get from the glove they are using. There are four mechanical threats that a CE mechanical rating addresses.

These are:

1. Abrasions: **Scrapes to the hand by abrasive surfaces.**
2. Cuts: **Lacerations to the hand by sharp blades or edges.**
3. Tears: **Tears to the skin caused by a protruding ragged edge.**
4. Punctures: **Punctures caused by protruding objects such as glass, nails or splinters.**

CE EN388 is the European testing standard by which gloves are tested for their resistance to these four threats.

Cuff Styles - Unsupported Gloves

STRAIGHT CUFF	PINKED CUFF	ROLLED OR BEADED CUFF
<ul style="list-style-type: none"> Provides additional length for protection from chemical run-offs 	<ul style="list-style-type: none"> Pinked or serrated cuff 	<ul style="list-style-type: none"> Provides increased protection from chemical droplets Greater cuff strength
		

Glove Patterns - Work Gloves

CLUTE CUT	GUNN CUT	REVERSIBLE
		

Cuff Styles - Supported / Cotton / Leather

SAFETY CUFF	GAUNTLET
 <ul style="list-style-type: none"> Allows glove to slide on and off with ease Helps to protect the wrist Will not soften when exposed to washing or perspiration 	 <ul style="list-style-type: none"> Allows glove to slide on and off with ease Additional protection for lower forearms Maximum forearm dexterity
KNITWRIST	SLIP ON
 <ul style="list-style-type: none"> Keeps the glove firmly in place Prevents debris from entering the glove 	 <ul style="list-style-type: none"> Economical design Easy donning

Work Gloves

INSPECTION GLOVES	CANVAS GLOVES	STRING KNIT GLOVES
<ul style="list-style-type: none"> Ideal for protecting products from scratches and smudges Available in 100% cotton or nylon 	<ul style="list-style-type: none"> General work gloves, washable Available in 100% cotton 	<ul style="list-style-type: none"> Knitwrist cuff and minimal shrinkage on washing Available in cotton/poly blend or 100% polyester

Leather Work Gloves

GRAIN LEATHER GLOVES	SPLIT LEATHER GLOVES
<ul style="list-style-type: none"> Smooth external side of the hide Provides durability and dexterity 	<ul style="list-style-type: none"> Rough inner side of the hide More economical

Nitrile industrial gloves are made from a co-polymer of acrylonitrile and butadiene. They protect well against physical hazards such as punctures, cuts, snags and abrasions. Nitrile also resists a wide range of chemicals, oils, fuels and organic solvents.

FEATURES

- 100% premium nitrile
- Available in a variety of thicknesses
- Available in unlined or flocklined
- Colour: Green or blue
- Textured surface for good grip
- Offers high flexibility and ease of finger movement
- High resistance to a variety of chemicals
- Highly resistant to abrasive tasks

Protective Apparel

Choosing the proper protective garments is very important in ensuring worker safety. Determining which apparel is best suited for a job requires thorough knowledge of the duties to be performed as well as an assessment of the workplace to spot environmental hazards. Sound

knowledge of the industry standards can also contribute to the proper selection of the type of apparel needed. RONCO offers a wide variety of safety apparel to address common protection needs and requirements of various industries.

- | | | | | |
|--------------------|---------------|------------------|-----------------|-------------------|
| • Aprons | • Sleeves | • Beard Covers | • Bouffant Caps | • Bump Caps |
| • Disposable Masks | • Rain Suits | • Labcoats | and Hairnets | • Traffic Vests |
| • Coveralls | • Shoe Covers | • Safety Glasses | • Ear Plugs | • Freezer Jackets |

RONCO protective apparel is made from premium quality material, ensuring reliability and safety for workers who depend on them to accomplish their daily activities. Many

of these products are approved by the Canadian Food Inspection Agency for use in federally registered food establishments.

**SOLUTION
FOR HACCP
COMPLIANCE**

Material Types

POLYETHYLENE

Most commonly used plastic; this is a single layer of polyethylene film providing good protection against fluids.

CPE (Cast polyethylene):

Excellent protection against liquids, oils and particulate matter

LDPE (Low density polyethylene):

Excellent resistance to water, moisture and most organic solvents

HDPE (high density polyethylene):

Excellent resistance against several acids, alkalis and solvents

Material properties:

Hardness: HDPE > LDPE

Strength: HDPE > LDPE

Ductility: HDPE < LDPE

Single use material

POLYURETHANE

A biodegradable material that reduces environmental impact; polyurethane provides excellent resistance against chemicals, acids, fats, oils and grease. The fabric is smooth and seamless; eliminates bacterial and dirt traps.

Material properties:

- Resistance to temperature down to -54°C / -65°F, up to 82°C / 180°F
- Excellent puncture, abrasion and tear resistance
- 100% waterproof
- Washable material; can be reused

POLYPROPYLENE

100% virgin spunbonded polypropylene; it is a single layer woven like fabric providing good protection against dry particulates and light fluids.

Material properties:

- Superior breathability
- Soft and lightweight

MICROPOROUS

Microporous material provides an effective short-term containment of contaminants in a sterile environment.

The construction is light in weight but provides comfort, strength, durability and impermeability.

It traps dirt, bacteria, spores and other airborne contaminants while allowing gasses to pass through it, making the material breathable.

Material properties

- Flexible and light-weight
- Breathable
- Strong
- Low linting
- Barrier against liquids

POLYETHYLENE APRONS FEATURES

- Made from polyethylene
- Smooth finish
- Colour: white, blue or yellow
- Available in 2 sizes: 28" x 46" & 38" x 60"
- Resistant to a variety of chemicals, fats and oils
- Four thicknesses: Economy, Standard, Premium and Premium Plus
- Flexible and lightweight

COVERME™ POLYETHYLENE APRONS
