POST CONSUMER FIBER (PCF) PAPER HOT CUPS

SOLO®

Supporting the use of post-consumer recycled content is a key tenet of Solo's Eco-Forward® platform. PCF hot cups contain paper which has completed the product life cycle as a consumer item and would otherwise end up in a landfill, such as paper collected from offices and school recycling programs. This post-consumer recycled fiber is incorporated into the cup reducing the use of virgin materials and the impact on valuable natural resources.

This post-consumer recycled fiber is incorporated into the cup reducing the use of virgin materials and the impact on valuable natural resources.

Upscale structural design, along with color and graphics capabilities offer excellent merchandising opportunities for high visual impact. Made from 90% renewable resources. There are two closure options; clear OPS dome lids or peelable film (plastic dome lids are not to be used in microwave or conventional ovens). In the microwave oven, heating is enhanced because Pressware® trays are transparent to microwave energy and cooking hot spot areas are reduced with rounded radius corners and bottoms.

Designed to stand up stoutly, no falling over or spilling. No need to double bag.
